

BIOCOCO™
100% NATURAL SKIN HEALTH
& BEAUTY OIL

100% PURE AND FAST ABSORBING MOISTURISING OIL FOR LONGER PROTECTION AGAINST DRY SKIN

The solution you'll ever need for a softer, youthful and moisturised skin with uplifting and refreshing geranium-lavender essential oils scent.

Why BIOCOCO Skin Health And Beauty Moisturising Oil

- Effective, 100% natural & safe
- Uses high grade active ingredients
- UV protection
- Penetrates deep to nourish, repair and rejuvenate skin
- Absorbs fast and hence not feel sticky
- Works faster to a softer, youthful and radiant skin
- Longer protection from dehydration
- Doesn't cause pimples but actually removes excess oil
- Smells uplifting and refreshing

Now, you can stop trying one skin cream after another that seem to work on initial use but disappoint in the long term. Most skin creams and lotions made up of mostly water and chemicals temporarily plump up the skin so that it looks smoother for the moment. But BIOCOCO Skin Health & Beauty Oil actively fights the causes of skin-ageing to protect, nourish and repair so skin actually becomes softer, healthier and more hydrated.

BIOCOCO Skin Health & Beauty Oil is formulated from 100% pure botanical plant extracts and VCO produced from a special 100% no heat process to retain all the minerals, minor compounds and vitamins, especially the all important Vitamin E. The antioxidant Vitamin E fights skin-ageing radicals and helps keep connective tissues strong and supple so that the skin doesn't sag and wrinkle. Anti-bacterial, anti-viral and anti-fungal properties maintain skin health and blemish-free smoothness. With daily use, your skin grows stronger, is renewed and takes on a youthful texture and glow.

BIOCOCO Skin Health & Beauty Oil is also excellent for pimples, acne, cuts, insect bites, rashes, oil and hot water-scalded skin, burns, bruises and many other skin problems.

All BIOCOCO products do not contain alcohol, artificial fragrance, artificial colouring, mineral oil, additives or preservatives that causes irritation, allergy & other skin problems, or chemical sun protection filters (SPF).

BIOCOCO™
100% NATURAL & HEAT-FREE

FINEST VIRGIN COCONUT OIL

MORE ANTIOXIDANTS AND NUTRIENTS

- 100% no heat + cold extraction process
- Mature coconuts contains more vitamins & minerals

Learn The Truth About Nature's Healthiest Dietary Oil

Research over the past four decades shows how misunderstood and maligned coconut oil has been. What is discovered is that the unique properties of Virgin Coconut Oil (VCO) are clearly and remarkably beneficial to good health and radiant skin. Here are some findings from published studies in medical journals about VCO.

- VCO is a rich source of medium chain fatty acids. The predominant fatty acid is lauric (C12), a major component of mother's milk and colostrum which provides newborn babies the necessary protection against infectious diseases. Lauric acid has antiviral, antifungal, antibacterial and antiprotzoal functions to protect our body against cancer-causing diseases, influenza, herpes, measles, ulcers, throat infections, urinary tract infections, fungi and yeast infections. It has been shown to lower the viral load of AIDS patients.
- VCO is naturally rich in the antioxidant Vitamin E (alpha & gamma tocopherols), which neutralises harmful free radicals that damage cells and cause premature ageing and degenerative diseases.
- VCO promotes weight loss by increasing metabolic rate.
- VCO improves digestion and bowel function.

- VCO helps relieve symptoms associated with gall bladder disease, ulcerative colitis and stomach ulcers.
- VCO is suitable for babies to improve immune system.
- VCO helps in Alzheimer & Parkinson disease.
- VCO supports hypo-thyroid function.

VCO is on the American Food and Drug Administration's (FDA) exclusive GRAS list, which means "Generally Regarded As Safe" (as a safe and natural food).

Why BIOCOCO's VCO Is Higher Grade For Drinking!

BIOCOCO VCO gives you most of the natural vitamins, micronutrients and health-enhancing properties of coconut oil. That is because BIOCOCO VCO is obtained from fresh mature kernel which contains more vitamins and minerals using 100% no heat production technology. This means without the use of heat in pre and post production, as well as without undergoing chemical refining, bleaching or deodorising.

TASTE
BIOCOCO VCO
TODAY, IT'S
LIGHTER &
SMOOTHER!

Due to its unique technology and a 24 hour production time from coconut harvest to final bottling, BIOCOCO VCO retains all its fresh goodness and natural potency bioactive state. It has a fresh raw coconut scent, and no rancid odour.

BIOCOCO presses the coconut meat once only (first press) to get pure coconut cream, and doesn't add water to extract more oil.
